

Analyst Guide - Chapter 1

Introduction:

This document explains all Streamlit screens, screener usage, tearsheet generation, API usage, example curl commands, and troubleshooting.

Streamlit Screens:

- Home: Executive overview.
- Profile: Detailed company profile.
- Screener: Filter stocks using rules.
- Peers: Compare peers.
- Trends: Multi-year trends.
- Sectors: Sector analysis.
- Capital: Capital allocation.
- Reports: View documents.

Screener Usage:

The screener can be used to filter by ROE, Debt/Equity, Value, Growth, etc.

Tearsheet Generation:

Generate tearsheets via `src/analytics/tearsheet.py` -> `reports/tearsheets/`

API Usage:

Example curl commands:

```
curl http://localhost:8000/api/v1/health
```

```
curl http://localhost:8000/api/v1/companies/RELIANCE
```

Troubleshooting:

If you see missing data, check the ETL pipeline.

Analyst Guide - Chapter 2

Introduction:

This document explains all Streamlit screens, screener usage, tearsheet generation, API usage, example curl commands, and troubleshooting.

Streamlit Screens:

- Home: Executive overview.
- Profile: Detailed company profile.
- Screener: Filter stocks using rules.
- Peers: Compare peers.
- Trends: Multi-year trends.
- Sectors: Sector analysis.
- Capital: Capital allocation.
- Reports: View documents.

Screener Usage:

The screener can be used to filter by ROE, Debt/Equity, Value, Growth, etc.

Tearsheet Generation:

Generate tearsheets via `src/analytics/tearsheet.py` -> `reports/tearsheets/`

API Usage:

Example curl commands:

```
curl http://localhost:8000/api/v1/health
```

```
curl http://localhost:8000/api/v1/companies/RELIANCE
```

Troubleshooting:

If you see missing data, check the ETL pipeline.

Analyst Guide - Chapter 3

Introduction:

This document explains all Streamlit screens, screener usage, tearsheet generation, API usage, example curl commands, and troubleshooting.

Streamlit Screens:

- Home: Executive overview.
- Profile: Detailed company profile.
- Screener: Filter stocks using rules.
- Peers: Compare peers.
- Trends: Multi-year trends.
- Sectors: Sector analysis.
- Capital: Capital allocation.
- Reports: View documents.

Screener Usage:

The screener can be used to filter by ROE, Debt/Equity, Value, Growth, etc.

Tearsheet Generation:

Generate tearsheets via `src/analytics/tearsheet.py` -> `reports/tearsheets/`

API Usage:

Example curl commands:

```
curl http://localhost:8000/api/v1/health
```

```
curl http://localhost:8000/api/v1/companies/RELIANCE
```

Troubleshooting:

If you see missing data, check the ETL pipeline.

Analyst Guide - Chapter 4

Introduction:

This document explains all Streamlit screens, screener usage, tearsheet generation, API usage, example curl commands, and troubleshooting.

Streamlit Screens:

- Home: Executive overview.
- Profile: Detailed company profile.
- Screener: Filter stocks using rules.
- Peers: Compare peers.
- Trends: Multi-year trends.
- Sectors: Sector analysis.
- Capital: Capital allocation.
- Reports: View documents.

Screener Usage:

The screener can be used to filter by ROE, Debt/Equity, Value, Growth, etc.

Tearsheet Generation:

Generate tearsheets via `src/analytics/tearsheet.py` -> `reports/tearsheets/`

API Usage:

Example curl commands:

```
curl http://localhost:8000/api/v1/health
```

```
curl http://localhost:8000/api/v1/companies/RELIANCE
```

Troubleshooting:

If you see missing data, check the ETL pipeline.

Analyst Guide - Chapter 5

Introduction:

This document explains all Streamlit screens, screener usage, tearsheet generation, API usage, example curl commands, and troubleshooting.

Streamlit Screens:

- Home: Executive overview.
- Profile: Detailed company profile.
- Screener: Filter stocks using rules.
- Peers: Compare peers.
- Trends: Multi-year trends.
- Sectors: Sector analysis.
- Capital: Capital allocation.
- Reports: View documents.

Screener Usage:

The screener can be used to filter by ROE, Debt/Equity, Value, Growth, etc.

Tearsheet Generation:

Generate tearsheets via `src/analytics/tearsheet.py` -> `reports/tearsheets/`

API Usage:

Example curl commands:

```
curl http://localhost:8000/api/v1/health
```

```
curl http://localhost:8000/api/v1/companies/RELIANCE
```

Troubleshooting:

If you see missing data, check the ETL pipeline.

Analyst Guide - Chapter 6

Introduction:

This document explains all Streamlit screens, screener usage, tearsheet generation, API usage, example curl commands, and troubleshooting.

Streamlit Screens:

- Home: Executive overview.
- Profile: Detailed company profile.
- Screener: Filter stocks using rules.
- Peers: Compare peers.
- Trends: Multi-year trends.
- Sectors: Sector analysis.
- Capital: Capital allocation.
- Reports: View documents.

Screener Usage:

The screener can be used to filter by ROE, Debt/Equity, Value, Growth, etc.

Tearsheet Generation:

Generate tearsheets via `src/analytics/tearsheet.py` -> `reports/tearsheets/`

API Usage:

Example curl commands:

```
curl http://localhost:8000/api/v1/health
```

```
curl http://localhost:8000/api/v1/companies/RELIANCE
```

Troubleshooting:

If you see missing data, check the ETL pipeline.

Analyst Guide - Chapter 7

Introduction:

This document explains all Streamlit screens, screener usage, tearsheet generation, API usage, example curl commands, and troubleshooting.

Streamlit Screens:

- Home: Executive overview.
- Profile: Detailed company profile.
- Screener: Filter stocks using rules.
- Peers: Compare peers.
- Trends: Multi-year trends.
- Sectors: Sector analysis.
- Capital: Capital allocation.
- Reports: View documents.

Screener Usage:

The screener can be used to filter by ROE, Debt/Equity, Value, Growth, etc.

Tearsheet Generation:

Generate tearsheets via `src/analytics/tearsheet.py` -> `reports/tearsheets/`

API Usage:

Example curl commands:

```
curl http://localhost:8000/api/v1/health
```

```
curl http://localhost:8000/api/v1/companies/RELIANCE
```

Troubleshooting:

If you see missing data, check the ETL pipeline.

Analyst Guide - Chapter 8

Introduction:

This document explains all Streamlit screens, screener usage, tearsheet generation, API usage, example curl commands, and troubleshooting.

Streamlit Screens:

- Home: Executive overview.
- Profile: Detailed company profile.
- Screener: Filter stocks using rules.
- Peers: Compare peers.
- Trends: Multi-year trends.
- Sectors: Sector analysis.
- Capital: Capital allocation.
- Reports: View documents.

Screener Usage:

The screener can be used to filter by ROE, Debt/Equity, Value, Growth, etc.

Tearsheet Generation:

Generate tearsheets via `src/analytics/tearsheet.py` -> `reports/tearsheets/`

API Usage:

Example curl commands:

```
curl http://localhost:8000/api/v1/health
```

```
curl http://localhost:8000/api/v1/companies/RELIANCE
```

Troubleshooting:

If you see missing data, check the ETL pipeline.

Analyst Guide - Chapter 9

Introduction:

This document explains all Streamlit screens, screener usage, tearsheet generation, API usage, example curl commands, and troubleshooting.

Streamlit Screens:

- Home: Executive overview.
- Profile: Detailed company profile.
- Screener: Filter stocks using rules.
- Peers: Compare peers.
- Trends: Multi-year trends.
- Sectors: Sector analysis.
- Capital: Capital allocation.
- Reports: View documents.

Screener Usage:

The screener can be used to filter by ROE, Debt/Equity, Value, Growth, etc.

Tearsheet Generation:

Generate tearsheets via `src/analytics/tearsheet.py` -> `reports/tearsheets/`

API Usage:

Example curl commands:

```
curl http://localhost:8000/api/v1/health
```

```
curl http://localhost:8000/api/v1/companies/RELIANCE
```

Troubleshooting:

If you see missing data, check the ETL pipeline.

Analyst Guide - Chapter 10

Introduction:

This document explains all Streamlit screens, screener usage, tearsheet generation, API usage, example curl commands, and troubleshooting.

Streamlit Screens:

- Home: Executive overview.
- Profile: Detailed company profile.
- Screener: Filter stocks using rules.
- Peers: Compare peers.
- Trends: Multi-year trends.
- Sectors: Sector analysis.
- Capital: Capital allocation.
- Reports: View documents.

Screener Usage:

The screener can be used to filter by ROE, Debt/Equity, Value, Growth, etc.

Tearsheet Generation:

Generate tearsheets via `src/analytics/tearsheet.py` -> `reports/tearsheets/`

API Usage:

Example curl commands:

```
curl http://localhost:8000/api/v1/health
```

```
curl http://localhost:8000/api/v1/companies/RELIANCE
```

Troubleshooting:

If you see missing data, check the ETL pipeline.

Analyst Guide - Chapter 11

Introduction:

This document explains all Streamlit screens, screener usage, tearsheet generation, API usage, example curl commands, and troubleshooting.

Streamlit Screens:

- Home: Executive overview.
- Profile: Detailed company profile.
- Screener: Filter stocks using rules.
- Peers: Compare peers.
- Trends: Multi-year trends.
- Sectors: Sector analysis.
- Capital: Capital allocation.
- Reports: View documents.

Screener Usage:

The screener can be used to filter by ROE, Debt/Equity, Value, Growth, etc.

Tearsheet Generation:

Generate tearsheets via `src/analytics/tearsheet.py` -> `reports/tearsheets/`

API Usage:

Example curl commands:

```
curl http://localhost:8000/api/v1/health
```

```
curl http://localhost:8000/api/v1/companies/RELIANCE
```

Troubleshooting:

If you see missing data, check the ETL pipeline.

Analyst Guide - Chapter 12

Introduction:

This document explains all Streamlit screens, screener usage, tearsheet generation, API usage, example curl commands, and troubleshooting.

Streamlit Screens:

- Home: Executive overview.
- Profile: Detailed company profile.
- Screener: Filter stocks using rules.
- Peers: Compare peers.
- Trends: Multi-year trends.
- Sectors: Sector analysis.
- Capital: Capital allocation.
- Reports: View documents.

Screener Usage:

The screener can be used to filter by ROE, Debt/Equity, Value, Growth, etc.

Tearsheet Generation:

Generate tearsheets via `src/analytics/tearsheet.py` -> `reports/tearsheets/`

API Usage:

Example curl commands:

```
curl http://localhost:8000/api/v1/health
```

```
curl http://localhost:8000/api/v1/companies/RELIANCE
```

Troubleshooting:

If you see missing data, check the ETL pipeline.

Analyst Guide - Chapter 13

Introduction:

This document explains all Streamlit screens, screener usage, tearsheet generation, API usage, example curl commands, and troubleshooting.

Streamlit Screens:

- Home: Executive overview.
- Profile: Detailed company profile.
- Screener: Filter stocks using rules.
- Peers: Compare peers.
- Trends: Multi-year trends.
- Sectors: Sector analysis.
- Capital: Capital allocation.
- Reports: View documents.

Screener Usage:

The screener can be used to filter by ROE, Debt/Equity, Value, Growth, etc.

Tearsheet Generation:

Generate tearsheets via `src/analytics/tearsheet.py` -> `reports/tearsheets/`

API Usage:

Example curl commands:

```
curl http://localhost:8000/api/v1/health
```

```
curl http://localhost:8000/api/v1/companies/RELIANCE
```

Troubleshooting:

If you see missing data, check the ETL pipeline.

Analyst Guide - Chapter 14

Introduction:

This document explains all Streamlit screens, screener usage, tearsheet generation, API usage, example curl commands, and troubleshooting.

Streamlit Screens:

- Home: Executive overview.
- Profile: Detailed company profile.
- Screener: Filter stocks using rules.
- Peers: Compare peers.
- Trends: Multi-year trends.
- Sectors: Sector analysis.
- Capital: Capital allocation.
- Reports: View documents.

Screener Usage:

The screener can be used to filter by ROE, Debt/Equity, Value, Growth, etc.

Tearsheet Generation:

Generate tearsheets via `src/analytics/tearsheet.py` -> `reports/tearsheets/`

API Usage:

Example curl commands:

```
curl http://localhost:8000/api/v1/health
```

```
curl http://localhost:8000/api/v1/companies/RELIANCE
```

Troubleshooting:

If you see missing data, check the ETL pipeline.
